Education and Visiting Appointment

Tsinghua University, Ph.D. in Economics (Advisor: Feng Dong) 2022.09–Present

Yale University, Visiting Assistant in Research, Economics (Host: Zhen Huo) 2026.01–2026.05

Tsinghua University, B.Econ.; B.S. in Math & Applied Math (Second Degree) 2018.09–2022.07

Research Interests

Macroeconomics; Data Economy and AI; Asset Bubbles; Production Networks; Green Transition

Job Market Paper

Haoning Sun. Common AI Information and Capital Allocation.

Abstract: This paper studies how AI progress affects capital allocation through financial information aggregation. Using institutional portfolio holdings, we document that manager pairs with greater common alignment with AI-extractable information subsequently hold more similar portfolios. Motivated by this evidence, we develop a model in which investors choose the quantity and composition of private and AI information, and firms learn from equilibrium asset prices before investing. A shared AI model error survives aggregation and enters prices, and investors may underestimate the overlap between AI information and prices. AI progress therefore changes both investors' information precision and prices' exposure to common errors. Cheaper access initially raises aggregate productivity when high costs keep AI use negligible, but further cost reductions can reverse the gain as AI research displaces private research. Improvements from very low model accuracy can instead lower productivity when increased reliance raises common-error exposure more than informed trading reduces noise-trader contamination. Numerical equilibria trace a J-shaped relationship between model accuracy and TFP. These results show how AI progress can expand investors' information acquisition while reducing the information prices convey to firms, worsening capital allocation even when firms use prices optimally.

Honors and Awards

First Prize in the Academic Research category of the People's Bank of China's Key Research Projects awards (a provincial/ministerial-level award in China)	2026
Academic Rising Star, 26th China Economics Annual Conference	2026
National Scholarship for Ph.D. Students	2026
Jiang Nanxiang Scholarship	2025
Jiang Zhen Scholarship	2025
National Scholarship for Ph.D. Students	2024
Jiang Zhen Scholarship	2023
Beijing Outstanding Graduate	2022
Tsinghua Outstanding Undergraduate Thesis	2022
Tsinghua Outstanding Graduate	2022
Friends of Tsinghua – Chen Xiaoyue Scholarship	2021
Friends of Tsinghua – Chen Xiaoyue Scholarship	2020
National Scholarship for Undergraduates	2019
Tsinghua First-Class Freshman Scholarship	2018
National Outstanding Communist Youth League Member	2016

Additional Information

Software	Proficient in MATLAB, Stata, and LaTeX; working knowledge of Python.
Languages	Chinese (native); English (CET6 630; TOEFL 112; English-medium teaching and presentations at international academic conferences).
Interests	Badminton, Soccer.
